

Examples: Project Navigator's Allocation Experience

EXAMPLE PROJECT

OUR ROLE

Confidential Site, NJ

30+ PRPs, complicated site history, toxicity ranges

Development of a credible and defensible allocation of remedial costs based on the identification of COC's associated with individual PRPs, waste analysis and chemical constituent analysis, proof of concept, operable units included upland soils and major river
Facilitation of allocation negotiations in an effort to avoid litigation

Confidential Site, Evansville, IN

Working for current site owner, identified additional parties including prior owners/operators and the United States, Conducted historical research including National Archives. Matching COC's with historical site operations and current environmental conditions in order to assign allocation. Litigation initiated prior to PNL involvement.

Confidential Client, Northeast

Developing research methodology to assign remedial liability at site with more than 200 years of operational history. PRPs include numerous private parties and the United States. Identification of entities with historical CGL insurance policies that may attach.

Operating Industries Inc. Landfill, CA
